

# Nature & Wildlife photographs taken on your hunting land by Wildscapes

## Hunting Land

Wildscapes can shoot a custom body of work on your hunting land, creating images that are recognizable and comforting. The photographs will include nature and a variety of wildlife shots.

Later on we can place the photos anywhere, in your business, hunting camp, beach house, home, and anyplace else you would like. Wildscapes can do themes and will work with you to develop a custom photo art package, including optional matting and framing based around your color scheme. Every print is an original, custom-produced in the size and shape you request.

Wildscapes can do themes centered around a particular subject matter. We can even go one step further and create custom photographs for any property.

**You will own the copyright to the photographs if you like.**

Commissioned Photography Service  
— call Mark for consultation

Melvin's photography not only captures the essence of the subject, but expresses his own unique artistic vision. His approach to photography is based on his belief in the vigor and values of the world of nature. A single image may communicate meaningful experiences, complex emotions, and abstract concepts. Melvin's moving nature photography was featured in *Mississippi Outdoors* and in the Jackson, Mississippi *Clarion Ledger* Business Section.
